FOOD ❧ BANK
OF THE ROCKIES™

Wherever hunger rises, so can we.

Link2Feed is a client intake software that safely and confidentially stores information. The program helps to determine program eligibility and provides Food Bank of the Rockies and its partners information about hunger–relief efforts in the community.

❧ Our promise to you:

We will keep your information safe and secure.

We will treat you and your information with dignity and respect.

We will never share your personal, individual information with anyone outside of the Food Bank of the Rockies partner network.

We will never sell the information provided.

Similar to the banking industry, Link2Feed has a high security standard.

Link2Feed is bound by a licensing agreement to protect your personal information.

❧ Why use Link2Feed?

The collected information helps Hunger Relief Partners and Food Bank of the Rockies better understand hunger in our community.

Future visits will be faster as information only needs to be collected once instead of at each visit.

Recording information on Link2Feed's secure database is much safer than recording it on paper.

❧ Who can access my information?

Only trained personnel can log into the system.

This Hunger Relief Partner and Food Bank of the Rockies can run anonymous reports to look for trends and learn more about the community.

Reports will not include personally identifiable information about you (name, address, date of birth)

❧ What information is asked?

Name, date of birth, and address are required.

Additional questions such as household members, ethnicity, education level, income level, and dietary considerations are not required but assist our Hunger Relief Partners to better meet your needs.

If you do not want to provide your information or you feel uncomfortable answering any questions, we respect that choice and will do our best to provide services to you no matter what.
